

Performance Testing

Date	01 October 2026
Team ID	SWTID-2026-4522
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	ServiceNow Flow Designer - Executions, System Logs > Emails (Preview mail) and the ticket form
Type of Testing	Functional and response-time testing of the auto classification flow (single and small batch of tickets)
Target Module / API	Flow: Auto Classify School IT Tickets on the Incident Workflow table
Test Environment	Hosted - ServiceNow Personal Developer Instance
Test Date	[Enter date of testing]

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Create a ticket with Short Description "WiFi not working in library"	1	10	Category = Network, Subcategory = Wi-Fi; email sent to the caller
2	Create a ticket with Short Description "Projector not turning on"	1	10	Category = Hardware, Subcategory = Projector; email sent
3	Create tickets for "Forgot password" and "Slow computer"	1	20	Access / Forgot Password and Performance / Slow Computer
4	Create a batch of 10 tickets one after another	1	60	All 10 classified and 10 emails logged; no flow errors

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds			
2	Response Time (Max)	< 5 seconds			
3	Throughput (Req/sec)				
4	Error Rate	< 1%			
5	CPU Utilization	< 80%			
6	Memory Utilization	< 80%			

Step 4: Observations & Analysis

[Write observations after running the scenarios - e.g. flow execution time shown in Flow Designer > Executions, number of tickets classified correctly, any keyword that was missed.]

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

[Screenshot: Flow Designer execution details and Emails log]
