

Solution Architecture

Date	01 October 2026
Team ID	SWTID-2026-4522
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Form where the caller enters the Caller name and Short Description; list view for IT agents.	ServiceNow Platform UI, Form Designer
Trigger / Platform Gateway	Starts the automation when a record is created in the Incident Workflow table and Category is empty.	Flow Designer trigger (Record Created)
Automation Logic	If / Else If conditions check the Short Description; Update Record sets Category and Subcategory; Send Email notifies the caller.	Flow Designer actions: Flow Logic, Update Record, Send Email
Database	Stores tickets with Auto Number, choice fields and references to users and groups; logs sent emails.	Incident Workflow table, sys_user, sys_user_group, Emails log
