

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-4522
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes - Project Update Set XML
2	README / Setup Guide (instructions to run the project)	Yes - Project Documentation
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	Yes - table and fields are inside the update set
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes - ServiceNow instance
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	NA

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

SWTID-2026-4522_Project/
|-- 1. Brainstorming & Ideation/
|-- 2. Requirement Analysis/
|-- 3. Project Design Phase/
|-- 4. Project Planning Phase/
|-- 5. Project Development Phase/
|-- 6. Project Testing/
|-- 7. Project Documentation/
|   |-- Project Executable Files.pdf
|   |-- Sample Project Documentation.pdf
|   |-- Project_Update_Set.xml    (exported from ServiceNow)
|-- 8. Project Demonstration/

```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[Add your ServiceNow instance URL]
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	ServiceNow (Personal Developer Instance)
Repository Link	[Add your GitHub link]
Demo Video Link	[Add link if required]

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Log in to the ServiceNow instance as an administrator.
2. Go to All > Retrieved Update Sets > Import Update Set from XML, choose Project_Update_Set.xml and click Upload.
3. Open the uploaded update set, click Preview Update Set and then Commit Update Set.
4. Open the Incident Workflow table and click New.
5. Select a Caller and enter a Short Description, for example "WiFi not working in library". Save the form.
6. Reload the form - Category = Network and Subcategory = Wi-Fi are filled automatically.
7. Open All > System Logs > Emails and search the subject "Your Request for the issue has been submitted" to confirm the email.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Classification depends on keywords being present in the Short Description (for example "Wi-Fi" vs "WiFi").	Add more Contains conditions / keywords to the flow.
2	A ticket with no matching keyword stays without a category.	IT agent classifies it manually; keywords can be extended.
3	Email delivery depends on the instance's outbound email configuration.	Verify in System Logs > Emails (Preview mail).
