

Code-Layout, Readability and Reusability

Date	01 October 2026
Team ID	SWTID-2026-4522
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development. This project is a no-code ServiceNow configuration, so the same criteria are applied to the table, fields, flow and update set.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Flow Designer lays out conditions in a uniform nested structure.
2	Proper File Structure	Files and folders are logically organized	Yes	Phase-wise folders and a single Project Update Set.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Fields named Caller, Category, Subcategory, Short Description, State.
4	Function / Method Names	Functions are descriptively named	Yes	Flow and conditions named clearly, e.g. Auto Classify School IT Tickets.
5	Code Comments	Inline and block comments explain logic	Partial	Condition labels describe each rule; no script comments needed.
6	Modular Design	Code is split into reusable functions/modules	Yes	One If / Else If block per issue type, then a separate email action.
7	No Redundant Code	Duplicate or unused code is removed	Yes	No scripts; one action per outcome.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Tickets with no keyword stay unclassified for manual review.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Incident Workflow table	ServiceNow table	Any helpdesk or request-tracking use case	High
2	Dependent Category / Subcategory choices	Dictionary dependent field	Any form with parent-child choices	High
3	Auto Classify flow (If / Else If)	Flow Designer	Other keyword-based routing flows	Medium
4	Send Email action	Flow Designer action	Any flow that must notify a user	High
5	Project Update Set	Update Set (XML)	Import into another ServiceNow instance	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clear phase-wise structure and naming.
Readability	4	Flow conditions are easy to read for non-developers.
Reusability	4	Table, flow and update set are portable.
Documentation / Comments	4	Step-by-step project documentation is provided.
Overall Score	4	Maintainable and easily extendable.
